Volume 04, No. 48

Agricultural Summary: Precipitation and wet fields limited fieldwork to an average of 2.1 days last week, Statewide. Topsoil moisture was rated 7 percent short, 65 percent adequate, and 28 percent surplus. Subsoil moisture was rated 7 percent very short, 22 percent short, 57 percent adequate, and 14 percent surplus.

Field Crop Report: Eighty-nine percent of the soybeans have been harvested, 10 points behind both last year and the 5-year average. Eighty-five percent of sorghum has been harvested for grain, 11 points behind last year and 13 points behind the 5-year average. Eighty-five percent of the sunflowers have been harvested, compared to 99 percent for both last year and the 5-year average. Ninety-six percent of the wheat has emerged, compared to 95 percent for both last year and the 5-year average. Twelve percent of the wheat acreage is being pastured, compared to 13 percent last year and 11 percent for the 5-year average. Wheat condition is rated 1 percent very poor, 3 percent poor, 19 percent fair, 59 percent good, and 18 percent excellent. Cotton condition is rated 1 percent very poor, 8 percent poor, 48 percent fair, 39 percent good, and 4 percent excellent.

Pasture and Range Report: Feed grain supplies are rated 1 percent very short, 4 percent short, 76 percent adequate, and 19 percent surplus. Hay and forage supplies are rated 1 percent very short, 5 percent short, 75 percent adequate, and 19 percent surplus. Stock water supplies are rated 2 percent very short, 13 percent short, 81 percent adequate, and 4 percent surplus.

Please note that only monthly Crop Weather reports are issued for December, January, and February. Weekly Crop Weather reports will resume Monday, March 14, 2005 (following the February release on March 7th).
